All You Wanted To Know About Overhead Cranes

BEVCON WAYORS PVT LTD

In Big League

Thanks to its association with world-class companies, this company is able to offer you the right solution for your requirements.

The way the Hyderabad-based Bevcon Wayors Pvt Ltd is growing, one would think that the company would soon lose its SME status and be rated among the biggies in material handling equipment. The company today is a major player/manufacturer of Material Handling Equipments in India.

Established in 1991, Bevcon Wayors had a steady growth and now has established itself as one of the leading Material Handling, Crushing and Screening Systems companies in India.

To briefly tell you what Bevcon Wayors is into, the company is engaged in the business of Bulk Material Handling, Crushing, and Screening Equipment for all sectors of industries. Bevcon Wayors designs, manufactures, supplies and

undertakes erection & commissioning. All equipments and products undergo rigorous quality control checks and are manufactured to the highest engineering standards. The company brings you its products in association with world's Best technology leaders like Burwell Technologies, Dos Santos International, Nergeco, Friedrich, Aerobelt Australia conveyor, Let's take a close look at just a few of its innovative products. First, Aerobelt Conveyors. These are air cushioned conveyors which require low pressure air. As there are no idlers it reduces the resistance and thereby smaller drive and less power, reduce installation and

running cost. They offer a high level of economy, where bulk materials have to be transported. Bevcon Wayors maintain a highly skilled engineering division specializing in the design, manufacture, and installation and commissioning of conveyor systems. These conveyors are

P Suneel Lakshman, MD

mostly used for bulk material transportation, Boiler feeding and in-plant handling of general materials. Bevcon Wayors manufactures different types of Aerobelt and normal conveyors to convey wide range of materials involving varied applications.

Secondly Crushers and Flip Flow vibrating Screens. Bevcon Wayors manufactures crushers up to 500 TPH capacity and flip flow screens upto sizes of 2.4 x 8 mts, one of the largest in the world. Flip flow screens are for high moisture materials screening. Apart from above Bevcon also specializes in Cartridge type dust collection, Pneumatic Ash handling, roller conveyors, screw conveyors, bucket elevators, steep angle conveyors for various applications to a wide sector of the industry.
