## Beko Compressed Air Technologies Pvt. Ltd.

For more than two decades, BEKO has developed, manufactured and sold high quality, reliable and efficient components and systems for compressed air processing and condensate technology. BEKO stands for compressed air technology "at its best". Now, BEKO offers a complete program for all tasks related to the transport and processing of compressed air. Expert advice and a qualified service are a trademark of the company. a BEKO always focuses on the customer and on his unique demands. The BEKO consultants and development engineers are trained in the latest developments in order to implement futureproof solutions for their clients. Operational reliability, energy conservation, environmental friendliness and a contribution to decent working conditions constitute important focal points of the BEKO philosophy.

For more than two decades, BEKO has developed, manufactured and sold high-quality, reliable and efficient components and systems for compressed air processing and condensate technology.

### PRODUCTS: CLEARPOINT®

The condensate drain plays an important role in ensuring optimum filtration. What is the use of a high class filter, if the drain attached to the filter gives poor performance or is simply not suited for the job? In order to prevent this, CLEARPOINT® filters are equipped with the best condensate drain available: The electronically level controlled BEKOMAT® 20 FM. In addition to the well known reliable functions of a BEKOMAT®, this unit was developed especially for the use with filters and offers additional advantages:

- Integrated monitoring of the useful lifetime of the filter element to automatically indicate the optimal time of element change
- Easily readable, informative display
- Potential free contact for relaying a fault signal to a control centre
- Condensate discharge at the rear through elbow connector, ideal for installation close to a wall

## Bevcon Wayors Pvt. Ltd.

Industry leader in providing high quality, technologically advanced Bulk Material Handling Systems—Crushing, Screening, Dust Extraction, Pneumatics and Special Conveying Equipment.

Bevcon Wayors is the industry leader in providing high quality, technologically advanced Bulk Material Handling Systems—Crushing, Screening, Dust Extraction, Pneumatics and Special Conveying Equipment. Bevcon Wayors' turnkey solutions include custom design, manufacturing, installation and servicing of bulk material handling equipment. Bevcon Wayors manufactures majority of the equipment in its own facilities. This provides Bevcon's customers greater flexibility for custom designs most suitable for their needs. Bevcon's key strength has been its world class Research & Development division providing cutting edge solutions and designs of long term value. Sale is only a part of the solution that Bevcon offers. Each sale is preceded by strategic consulting backed by more than 125 years of domain expertise of the senior management.

### PRODUCT:

#### CLEATED BELT CONVEYOR:

The Cleated Belt Conveyor Range offered by Bevcon Wayors enables conveying of bulk materials over very

steep angles upto 90 degrees. Our design provides for tight product transfers and the ability to fit into space-constrained areas.

High tensile strength cleated belt offer superior strength-to-weight ratio and are available in various styles and heights up to 40 meters. Cleats are welded to suit the customer desired spacing and never glued to the top surface of the belt. All components of their conveyors are produced on state-of-the art manufacturing equipment.
